MEMORANDUM

10 July 1951

TO: []

FROM: []

SUBJECT: Progress Report BGFiend/BGFlume for May and June 1951

1. Radio. During the two months under consideration [] devoted considerable time to KMHanal. He took two cruises on board the vessel, the first from May 21 to May 25, and the second from June 19 through June 22. The first of these was thoroughly reported in 542-CAGWU. As ZRMetal is aware, the findings of this cruise were later rejected on the grounds that the vessel was never intended to operate as close to the target area as QKCaddy. Following the arrival of [] and [] early in June, further tests were undertaken to determine the effectiveness of the medium-wave transmitter from 150 to 300 miles from the target area. These tests are still under way and will no doubt be thoroughly reported by the technicians concerned. In the meantime, the radio BGFlume staff of BGFiend is prepared to commence broadcasting as soon as a decision is reached on the use of KMHanal. While the transmitting tests have been under way, the radio BGFlume staff has been going through the motions of preparing a daily program and has perfected its arrangements to the point where we are quite confident that we can carry on smoothly when actual broadcasting gets under way.

2. Leaflets. At the end of June decisions were made by [] and [] during their LCDrink visit which settled some of the pending questions delaying the leaflet program. It was decided to cancel all exclusively leaflet air drops over LGBatland. The radio announcement leaflet will not be dropped and the whole program of preparing leaflet texts is to be cancelled. In its place, [] and [] suggested testing the feasibility of BGFlume supply drops, i.e., parcels of food and household goods, each equipped with a small parachute. One such drop has been approved on a test basis and ZRMetal will shortly be informed of the Headquarters support required to make this drop possible. During their visit to LCDrink, [] and [] also approved a project for inserting printed BGFlume into freight shipments destined for LGBatland and transhipped from rail to ship at FJMinor. As ZRMetal has been informed in the past, investigations by [] and [] in FJMinor reveal that such material could be readily inserted by HICurio officials who are charged with the duty of inspecting these cargoes. It remains for us to develop facilities to print small quantities of such leaflets in LCDrink. Until such facilities are developed here, the only available material for such distribution is the fourth cartoon leaflet referred to in WASH 48247. If the contents of this leaflet are approved for current distribution, it can very well be used in small quantities through FJMinor channels. Of course the original plan for distributing it by air will have to be dropped.

3. Printing Press. We have almost completed arrangements in LCDrink for putting the #1250 multilith multigraph machine into operation. Since it is an innocuous-seeming piece of office equipment, we have agreed to set it up temporarily in our Rhino prem ses where the local agent of the manufacturer can give instruction to members of our staff on its operation. After such instruction has been digested by the staff, we will move the machine to another location where it can be used for clandestine printing operations in security.

4. Personnel. There have been a few changes in our radio BGFlume establishment in

LCDrink since the last report on this subject in 541-CAGWU. [] an INMaledict candidate now in TPCredo. has been scratched. No replacement will be recruited since the cancellation of [] candidacy brought the Maledict representation in the radio BGFlume staff down to an equal number with the representation of the HTMelons. A further change resulted from the decision of HTNeigh to transfer [] from his present assignment with the BGFlume staff in LCDrink to ERKlope. Our present plans call for replacement of [] with Identity (1). With these changes the actual and prospective staff is as follows:

[]

- Chief Editor; Independent
- Clerk-Translator; Independent
- Boat Editor; INMaledict

Identity (1) - Writer-Announcer; INMaledict.
Identity (2) - Writer-Announcer aboard boat; HTMelon
Identity (3) - Writer-Announcer; HTMelon

It is possible that Identity (3), whose clearance has not yet been requested will be replaced in this position by Identity (4), an HTMelon presently in QKDimple who has already been cleared. The question will be decided in TPCredo.

5. Mail Campaign. Little has been done in the prosecution of the mail BGFlume program in LCDrink or TPCredo because of the pressure of other business. [] reported that a second gift package has been sent to Mrs. Nelson B. Murat in LCBatland according to the instructions forwarded in 36-CAGRI. An attempt will be made to prepare a second Identity (5) circular similar to the one supplied the resupply team which was dropped in LCBatland on 18-19 May. If this material can be prepared in time, it will be given to the group to be dropped during the July moon period. Letters will also be prepared in LCDrink to be mailed from inside LCBatland. These will be character assassination and denunciation letters.

6. BGFlume BGHives. During the period under consideration we had a certain amount of success in establishing a system of extracting BGFlume BGHives from recent arrivals from LCBatland. The interrogations are carried out by [] in accordance with guidance provided him by [] and []. This has been a pilot operation which has been useful to us in locating pitfalls and sharpening techniques for extracting the kind of information we require. It is hoped later on, with the help of Ogive and additional Batman-speaking personnel expected from ZRMetal, that we will be able to go more deeply into this kind of activity. Further details will be forwarded in the future, as developments warrant.
